Drawing on a Rich History!

Since 1856, Fremont has been a city of planning and innovation. In the wake of John C. Fremont, the "Pathfinder" General, your founders laid out their city to provide an environment for commerce, education, housing, recreation and government. In its first ten years, Fremont was home to the railroad, the postal service, the California Stage, a hometown bank and one of the leading newspapers in eastern Nebraska. In those early decades, Fremont was planning for its future.

Forging a Strong Community!

Today, you are the pioneers of the future... planning for a prosperous tomorrow for yourselves and your children. In the fall of 1983, you took the first step of integrating energy planning and action into the plan for the Fremont of tomorrow. Since that time, your accomplishments have been varied and significant... ● gaining an additional \$100,000 in economic activity for Fremont's economy as a result of implementing energy management plans ● reducing city government's energy operating costs by \$18,000 through energy efficiency improvements. Taxpayers have realized a 13.7% rate of return on that investment. ● starting to weatherize over 300 homes using Energy Bank financing. When completed, this investment will earn a 8.3% rate of return from the resulting energy savings.

Charting Your Future Path!

On Monday, July 29th at 5:30 in the City Hall, you'll have a chance to chart new directions in energy management for Fremont and its economy. Some of the new opportunities that have been suggested are: ● two proposals affecting the business community which could maintain or create jobs and lower operating costs ● a proposal to expand the current financing opportunities of the Energy Bank ● a proposal to find new ways of reducing city government's energy operating costs ● a proposal to seek innovative ways for the municipal utility to identify wise energy efficiency investments in the future. Come and make your views known on these and more on the 29th.
